MD ABID HASSAN

OBJECTIVE

To pursue a carrier whereas I can apply my existing academic as well as industrial knowledges and practical experiences based on Object Oriented Programming, Web Technology and Database to develop various applications. In addition, I am determined to explore my potential and serve my duties with dedication.

EXPERIENCES

❖ **Industry Experiences-**

I've experienced for three and a half years at two respectable software companies. I've got the chance to work as a Senior Software Engineer (One year currently) as well as a Software Engineer (Two years formerly) in 'Gulf State Software' a USA based software company. Previously, I worked for 'Shikkhanobish' as a Junior Software Engineer for Six months.

I got the opportunities to work on several worthwhile projects while I was employed there. Among the projects, the notable ones stand out: warehouse management, event mapping (via Google Map) and online education platform. Elaborately: -

- **Full Stack:** Three Web applications. Among them, Two in ASP.Net MVC Core and another one in ASP.Net MVC. All of them applied by Entity Framework and designed with Repository Pattern.
- **Backend:** Four RESTful API based projects with ASP.Net MVC Core. Among them, three with Entity Framework & Repository pattern and another one fully based on Stored Procedure with ADO.NET.
- **Frontend:** One Project with Blazor.
- **Windows:** One Windows Application with WPF.
- **Android:** One Xamarin Android App UI only.

❖ **Notable Academic Projects-**

- House Rent {ASP.Net Core Full Stack Web}
- Online Device Shop {ASP.Net Core Full Stack Web}
- Akij Food (RESTful Web API with ASP.Net Core)
- Student Management {ASP.Net Full Stack Web}
- Online Book Shop {ASP.Net Full Stack Web}
- Student Course Registration {Desktop App with WinForms}
