MD ABID HASSAN

OBJECTIVE

To pursue a carrier whereas I can apply my existing academic as well as industry knowledges and practical experiences based on Object Oriented Programming, Web Technology and Database to develop various applications. In addition, I am determined to explore my potential and serve my duties with dedication.

EXPERIENCES

❖ **Industry Experiences-**

I've experienced for three and a half years at two respectable software companies. I've got the chance to work as a Senior Software Engineer (One year currently) as well as a Software Engineer (Two years formerly) in 'Gulf State Software' a USA based software company. Previously, I worked for 'Shikkhanobish' as a Junior Software Engineer for Six months.

I got the opportunities to work on several worthwhile projects while I was employed there. Among the projects, the notable ones stand out: warehouse management, event mapping (via Google Map) and online education platform. Elaborately: -

- **Full Stack:** Two Web applications in ASP.Net MVC. Among them, one with Entity Framework and another one with Entity Framework designed by Repository Pattern.
- **Backend:** Three API based projects with ASP.Net MVC. Among them one fully based on Stored Procedure and another two with Entity Framework.
- **Frontend:** One project on Blazor.
- **Android:** One Xamarin Android App UI only.

❖ **Notable Academic Projects-**

- Student Course Registration (C#) {Desktop App}
- Student Management (C#, HTML, CSS, JavaScript) {ASP.Net Full Stack Web}
- Online Book Shop (C#, HTML, CSS, Bootstrap, JavaScript) {ASP.Net Full Stack Web}
- House Rent (C#, HTML, CSS, Bootstrap, JavaScript) {ASP.Net Core Full Stack Web}
- Online Device Shop (C#, HTML, CSS, Bootstrap, JavaScript) {ASP.Net Core Full Stack Web}
- Akij Food (Web API with ASP.Net Core)
